

Subscription & Renewal Policy

Auto-renew mechanics

Every paid subscription has an auto-renew setting, on or off, controlled by the subscriber at any time from the account page. When auto-renew is on, the subscription charges the plan's list price (less any active discount) automatically at the end of the current `payment_plan_days` cycle and the cycle continues uninterrupted. When auto-renew is off, the subscription reaches its expiry date at the end of the current cycle and access lapses unless the subscriber manually renews before that date.

Turning auto-renew off does not cancel the current cycle - the subscriber retains access until the existing paid period ends. It only prevents the automatic charge that would start the next cycle.

Plan lengths and pricing

Plans are offered at several `payment_plan_days` lengths (commonly 30, 90, 180, and 365 days). Longer plans carry a lower effective per-day rate (`plan_list_price` divided across more days) in exchange for the longer up-front commitment. A subscriber can change plan length at any renewal boundary; a mid-cycle plan change takes effect at the next renewal, not immediately, to avoid pro-rating disputes.

Cancellation

A subscriber may cancel at any time. Cancellation before the end of a paid cycle does not issue a refund for the remaining days by default; access continues through the end of the period already paid for, after which the account lapses. A cancellation is recorded separately from a simple auto-renew-off, since a cancellation also blocks any pending renewal transaction outright rather than merely not scheduling a new one.

Discounts and promotional pricing

A discount reduces `actual_amount_paid` below the plan's `plan_list_price` for a defined promotional window. Unless a subscriber is on an explicitly recurring loyalty rate, a discount applies to a fixed number of cycles and the plan reverts to `plan_list_price` at the discount's expiry, at which point the subscriber will see a higher charge on the next auto-renewal unless a new offer is applied before that date.
